

# Combined Drinking Fountain and Bottle Filler

**Product code: DFBF**

The combined drinking fountain and bottle filler is a dual purpose floor standing drinking water station providing a traditional drinking water fountain with a convenient recessed bottle filling station built into the front of the unit. Available in both Adult and junior height versions.

**Material:**

Manufactured from grade 304 stainless steel for durability and vandal resistance.

**Design:**

The drinking fountain and bottle filling station has an integral full height shroud to conceal the waste and supply pipework. The whole unit has a smooth radius corners eliminating sharp corners to prevent injury.

**Waste Outlets:**

The drinking fountain and bottle filling station are both supplied with a 32mm (1 1/4 in) BSP flush grated waste fitting and flexible waste outlet pipe with joining T piece.

**Bubbler Valve:**

The drinking fountain is supplied with a WRAS approved chrome plated bubbler valve with self-closing push button valve.

**Bottle Filling Tap:**

The bottle filling station is recessed into the front of the shroud and is sized to accept all common 0.5, 0.75 and 1.0 litre bottles. Fitted into the top of the recess is a WRAS approved press button tap. The bottle filling tap is operated by the chrome plated push button. The water flows when the button is pressed and held in and turns off when the press button is released to help conserve water.
