Metropolitan Solid Surface Wash Trough

Product Code MSSW

Metropolitan solid surface wash troughs are manufactured from Hi-Macs solid surface material. The Metropolitan solid surface wash trough is manufactured with a forward sloping base and a front covered central waste fitting. The clean modern design will compliment any wash room area, and has proven popular in many prestigious board rooms and office blocks. The hidden waste keeps the wash trough appearance clean, and reduces regular maintenance and cleaning times. The strength and durability of the solid surface material makes this an ideal solution for office blocks, school washrooms, as well as many other applications such as nightclubs, pubs, hotels, restaurants, shopping centers, and hospitals.

Styles

Wall mounted design with wall brackets.

Sit-on vanity mounted design without front fascia (for mounting on vanity unit by others).

Details

Taplanding design for deck mounted taps.

Slotted waste channel at front concealed 38mm waste fitting.

Standard lengths: 1200, 1800, 2400, 3000 and 3600mm long or made to measure up to 3600mm long.

Smooth hygienic non-porous material which inhibits the growth of mold.

Installation

Wall mounted units are supplied complete with wall brackets for the trough to sit on. The trough has a waterproof plywood panel bonded to the underside to allow fixing to the brackets. Due to the weight of these products adequate wall fixings points will be required.

Sit-on vanity unit mounted units will require suitable support underneath the trough along the whole length.

Taps

The solid surface Metropolitan style wash troughs can be supplied with or without taps.

Colours

The standard trough colour is Alpine White.

Metropolitan Solid Surface Wash Trough

Wall Brackets

Wall brackets for the wall mounted model. 350mm long and designed for minimum visibility.

HI-MACS® is made from a blend of 75% natural minerals and pigments set in an acrylic polymer matrix which inhibits the growth of bacteria and mold.

HI-MACS® has an eco-friendly non-porous surface with high resistance to everyday stains, scratches and heat. Durability is similar to that of natural stone. It is a renewable material and can be recycled at the end of its lifespan. Due to its superior quality and affordability HI-MACS® offers a better alternative than similar products such as other solid surfaces materials, plastic laminate, granite, synthetic stone and tile.

The solid surface wash troughs can also be manufactured in Corian material. The Corian solid surface material is manufactured by DuPont and is also a blend of natural minerals, pigments and acrylic polymer.
