

Outdoor Bottle Filler Push Button or Sensor Operation

Product Code OBF

The outdoor bottle filler is environmentally friendly and promotes the use of refillable water bottles whilst providing a fast, convenient way to obtain drinking water, and reduces the waste associated with disposable water bottles. Ideal for locations such as sports venues, parks, schools, and any public outdoor area.

Construction:

The outdoor bottle filler is manufactured from heavy gauge.

Stainless steel, or heavy gauge steel with a powder coated finish in green, red or blue.

The bottle filler pedestal has a fixing flange with pre-drilled holes for fixing bolts supplied by others. As an option a ground mounting plate can be supplied. The ground mounting plate requires installation into the floor.

The bottle filler has a removable access panel with vandal resistant screws. Replaceable internal water filter.

Operation:

Push button control as standard.

Push button control with additional sensor operation.

Size:

Height: 1320mm.

Height to base of filler recess: 927mm.

Diameter: 305mm .

Options:

Stainless steel or powder coated steel finish.

Ground mounting plate.
